documentary

A GRAVEL BEACH OF LIFE is a short documentary film showing the geology of Croatian beaches, their conservation, and how much life exists in these seemingly lifeless places.

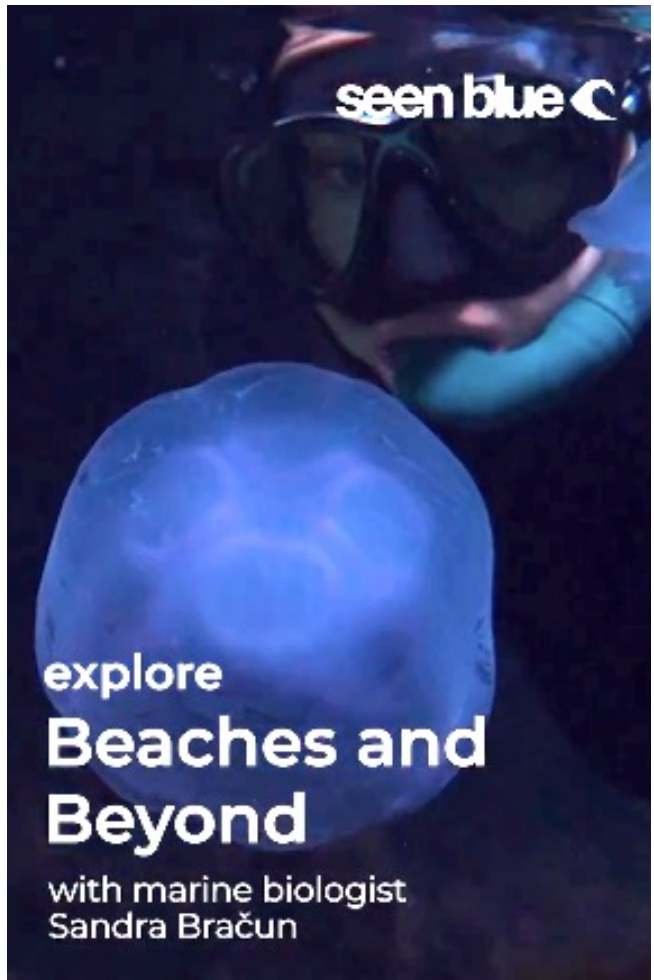

Marine Ecologist Sandra Bračun is taking the film viewer on her journey to find out more about the life and the conservation of these beautiful places.

MAYDAYTERRANEAN

is a documentary film portraying the problems of the Mediterranean Sea as well as the beauty it still has to offer. Scientists, conservationists and activists from countries around the Mediterranean Sea talk about the topic, their relationship to ocean conservation and shed light on the story of this wonderful but endangered place.
